

Where the Conversion Leaks Are

voicenotes.com · CRO Recommendations · August 2026

The single most valuable conversion mechanism on this site is the primary signup CTA, but it is being diluted by competing CTAs and a lack of concrete value proposition, causing visitors to hesitate or leave the funnel. The homepage and pricing page both present multiple competing CTAs (Book a demo, Start for free, Get the desktop app, Contact support) alongside vague messaging like 'AI notetaker that works (magic) in the background', which fails to communicate the concrete outcome and forces users to choose among actions, bleeding conversion value.

9	Pricing lacks billing context Per-user prices are shown without billing period or commitment details, so visitors cannot tell if the price...	Medium	Medium	4/10
10	Email gate blocks enterprise evaluation The enterprise page asks for a business email before showing any value or pricing, creating a high-friction...	High	Medium	3/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
